Fields

Name	Label	Type	Attribute
account_cash_basis_base_account_active	Base Tax Received Account Active	boolean	
account_cash_basis_base_account_id	Base Tax Received Account	many2one	- relation = account.account
account_check_printing_date_label	Print Date Label	boolean	
account_check_printing_layout	Check Layout	selection	
account_check_printing_margin_left	Check Left Margin	float	
account_check_printing_margin_right	Check Right Margin	float	
account_check_printing_margin_top	Check Top Margin	float	
account_check_printing_multi_stub	Multi-Pages Check Stub	boolean	
account_default_credit_limit	Default Credit Limit	float	
account_discount_expense_allocation_active	Customer Invoices Discounts Account Active	boolean	
account_discount_expense_allocation_id	Customer Invoices Discounts Account	many2one	- relation = account.account
account_discount_income_allocation_active	Vendor Bills Discounts Account Active	boolean	
account_discount_income_allocation_id	Vendor Bills Discounts Account	many2one	- relation = account.account
account_fiscal_country_id	Fiscal Country Code	many2one	- relation = res.country
account_folder_id	account default folder	many2one	- relation = documents.document
account_journal_early_pay_discount_gain_account_active	Early Discount Gain Account Active	boolean	
account_journal_early_pay_discount_gain_account_id	Early Discount Gain	many2one	- relation = account.account
account_journal_early_pay_discount_loss_account_active	Early Discount Loss Account Active	boolean	

account_journal_early_pay_discount_loss_account_id	Early Discount Loss	many2one	- relation = account.account
account_journal_suspense_account_active	Bank Suspense Account Active	boolean	
account_journal_suspense_account_id	Bank Suspense	many2one	- relation = account.account
account_price_include	Default Sales Price Include	selection	
account_reports_negative_format	Negative amount display	selection	
account_return_periodicity	Periodicity	selection	
account_return_reminder_day	Deadline	integer	
account_storno	Storno accounting	boolean	
account_tax_return_journal_id	Journal	many2one	- relation = account.journal
account_use_credit_limit	Sales Credit Limit	boolean	
active_user_count	Number of Active Users	integer	
alias_domain_id	Alias Domain	many2one	- relation = mail.alias.domain
auth_signup_reset_password	Enable password reset from Login page	boolean	
auth_signup_template_user_id	Template user for new users created through signup	many2one	- relation = res.users - ondelete = Set NULL
auth_signup_uninvited	Customer Account	selection	- selection = [(b2b, On invitation), (b2c, Free sign up),]
auth_totp_enforce	Enforce two-factor authentication	boolean	
auth_totp_policy	Two-factor authentication enforcing policy	selection	- selection = [(employee_required, Employees only), (all_required, all users),]
automatic_invoice_reminder	Automatic Invoice Reminders	boolean	
autopost_bills	Auto-validate bills	boolean	
barcodelookup_api_key	API key	char	
chart_template	Chart Template	selection	
company_count	Number of Companies	integer	
company_country_code	Company Country Code	char	- size = 2
company_country_group_codes	Country Group Codes	json	
company_id	Company	many2one	- relation = res.company - ondelete = Cascade
company_informations	Company Informations	text	
company_name	Company Name	char	
country_code	Country Code	char	- size = 2
create_date	Created on	datetime	
create_uid	Created by	many2one	- relation = res.users - ondelete = Set NULL
currency_exchange_journal_id	Currency Exchange Journal	many2one	- relation = account.journal

currency_id	Currency	many2one	- relation = res.currency
currency_interval_unit	Interval Unit	selection	
currency_next_execution_date	Next Execution Date	date	
currency_provider	Service Provider	selection	
deferred_expense_account_active	Deferred Expense Account Active	boolean	
deferred_expense_account_id	Deferred Expense Account	many2one	- relation = account.account
deferred_expense_amount_computation_method	Deferred Expense Based on	selection	
deferred_expense_journal_id	Deferred Expense Journal	many2one	- relation = account.journal
deferred_expense_periodicity	Deferred Expense Periodicity	selection	
deferred_revenue_account_active	Deferred Revenue Account Active	boolean	
deferred_revenue_account_id	Deferred Revenue Account	many2one	- relation = account.account
deferred_revenue_amount_computation_method	Deferred Revenue Based on	selection	
deferred_revenue_journal_id	Deferred Revenue Journal	many2one	- relation = account.journal
deferred_revenue_periodicity	Deferred Revenue Periodicity	selection	
deletion_delay	Deletion Delay	integer	
digest_emails	Digest Emails	boolean	
digest_id	Digest Email	many2one	- relation = digest.digest - ondelete = Set NULL
disable_redirect_firebase_dynamic_link	Disable link redirection to mobile app	boolean	
display_account_storno	Display Account Storno	boolean	
display_invoice_amount_total_words	Total amount of invoice in letters	boolean	
display_invoice_tax_company_currency	Taxes in company currency	boolean	
display_name	Display Name	char	

document_sequence_editable	Document's sequence editable	boolean	
documents_product_settings	Product	boolean	
email_primary_color	Email Button Text	char	
email_secondary_color	Email Button Color	char	
enable_ocn	Push Notifications	boolean	
expense_account_active	Expense Account Active	boolean	
expense_account_id	Expense Account	many2one	- relation = account.account
expense_currency_exchange_account_active	Loss Exchange Rate Account Active	boolean	
expense_currency_exchange_account_id	Loss Exchange Rate Account	many2one	- relation = account.account
external_email_server_default	Use Custom Email Servers	boolean	
external_report_layout_id	Document Template	many2one	- relation = ir.ui.view
extract_bank_statement_digitalization_mode	Bank Statements	selection	
extract_in_invoice_digitalization_mode	Vendor Bills	selection	
extract_loan_digitalization_mode	Loans	selection	
extract_out_invoice_digitalization_mode	Customer Invoices	selection	
extract_single_line_per_tax	Single Invoice Line Per Tax	boolean	
fail_counter	Fail Mail	integer	
fiscalyear_last_day	Fiscalyear Last Day	integer	
fiscalyear_last_month	Fiscalyear Last Month	selection	
force_restrictive_audit_trail	Forced Audit Trail	boolean	
generate_deferred_expense_entries_method	Generate Deferred Expense Entries	selection	
generate_deferred_revenue_entries_method	Generate Deferred Revenue Entries	selection	
google_gmail_client_identifier	Gmail Client Id	char	
google_gmail_client_secret	Gmail Client Secret	char	
google_key	Google AI API key	char	
google_key_enabled	Enable custom Google API key	boolean	
google_translate_api_key	Message Translation API Key	char	
group_analytic_accounting	Analytic Accounting	boolean	
group_cash_rounding	Cash Rounding	boolean	
group_fiscal_year	Fiscal Years	boolean	
group_manage_template_access	Manage template access	boolean	
group_multi_currency	Multi-Currencies	boolean	
group_product_pricelist	Pricelists	boolean	
group_product_variant	Variants	boolean	
group_sale_delivery_address	Customer Addresses	boolean	

group_show_uom_price	Base Unit Price	boolean	
group_uom	Units of Measure & Packagings	boolean	
has_accounting_entries	Has Accounting Entries	boolean	
has_chart_of_accounts	Company has a chart of accounts	boolean	
id	ID	integer	
income_account_active	Income Account Active	boolean	
income_account_id	Income Account	many2one	- relation = account.account
income_currency_exchange_account_active	Gain Exchange Rate Account Active	boolean	
income_currency_exchange_account_id	Gain Exchange Rate Account	many2one	- relation = account.account
incoterm_id	Default incoterm	many2one	- relation = account.incoterms
installed_provider_id	Installed Provider	many2one	- relation = payment.provider - ondelete = Set NULL
invoice_terms	Terms & Conditions	html	
invoice_terms_html	Terms & Conditions as a Web page	html	
invoicing_switch_threshold	Invoicing Switch Threshold	date	
is_account_peppol_eligible	PEPPOL eligible	boolean	
is_root_company	Is Root Company	boolean	
language_count	Number of Languages	integer	
link_qr_code	Display Link QR-code	boolean	
map_box_token	Token Map Box	char	
max_transcription_retries	Max Transcription Retries	integer	
microsoft_outlook_client_identifier	Outlook Client Id	char	
microsoft_outlook_client_secret	Outlook Client Secret	char	
module_account_accountant	Accounting	boolean	

module_account_avatax	AvaTax	boolean	
module_account_bank_statement_extract	Bank Statement Digitization	boolean	
module_account_bank_statement_import_qif	Import .qif files	boolean	
module_account_batch_payment	Use batch payments	boolean	
module_account_budget	Budget Management	boolean	
module_account_check_printing	Allow check printing and deposits	boolean	
module_account_extract	Document Digitization	boolean	
module_account_inter_company_rules	Manage Inter Company	boolean	
module_account_intrastat	Intrastat	boolean	
module_account_invoice_extract	Invoice Digitization	boolean	
module_account_iso20022	SEPA Credit Transfer / ISO20022	boolean	
module_account_loan_extract	Loans Digitization	boolean	
module_account_payment	Invoice Online Payment	boolean	
module_account_peppol	PEPPOL Invoicing	boolean	
module_account_sepa_direct_debit	Use SEPA Direct Debit	boolean	
module_account_transfer	Enable Auto Transfer	boolean	
module_auth_ldap	LDAP Authentication	boolean	
module_auth_oauth	Use external authentication providers (OAuth)	boolean	
module_base_geolocalize	GeoLocalize	boolean	
module_base_import	Allow users to import data from CSV/XLS/XLSX/ODS files	boolean	
module_currency_rate_live	Automatic Currency Rates	boolean	
module_google_address_autocomplete	Google Address Autocomplete	boolean	
module_google_calendar	Allow the users to synchronize their calendar with Google Calendar	boolean	
module_google_gmail	Support Gmail Authentication	boolean	
module_google_recaptcha	reCAPTCHA	boolean	
module_loyalty	Promotions, Coupons, Gift Card & Loyalty Program	boolean	
module_microsoft_calendar	Allow the users to synchronize their calendar with Outlook Calendar	boolean	
module_microsoft_outlook	Support Outlook Authentication	boolean	
module_partner_autocomplete	Partner Autocomplete	boolean	
module_product_barcodelookup	Barcode Database	boolean	
module_product_margin	Allow Product Margin	boolean	
module_sign	Sign	boolean	
module_sign_esigner	Sign with Aadhaar eSign	boolean	
module_sign_itsme	Identify with itsme®	boolean	
module_sms	SMS	boolean	

module_snailmail_account	Snailmail	boolean	
module_voip	Phone	boolean	
module_web_unsplash	Unsplash Image Library	boolean	
module_website_cf_turnstile	Cloudflare Turnstile	boolean	
onboarding_payment_module	Onboarding Payment Module	selection	
openai_key	OpenAI API key	char	
openai_key_enabled	Enable custom OpenAI API key	boolean	
partner_autocomplete_insufficient_credit	Insufficient credit	boolean	
pay_invoices_online	Pay Invoices Online	boolean	
portal_allow_api_keys	Customer API Keys	boolean	
preview_ready	Display preview button	boolean	
product_folder_id	product default folder	many2one	- relation = documents.document
product_tag_ids	Product Tags	many2many	- relation = documents.tag
product_volume_volume_in_cubic_feet	Volume unit of measure	selection	- selection = [(0, Cubic Meters (m³)), (1, Cubic Feet (ft³)),]
product_weight_in_lbs	Weight unit of measure	selection	- selection = [(0, Kilograms (kg)), (1, Pounds (lb)),]
profiling_enabled_until	Profiling enabled until	datetime	
purchase_tax_id	Default Purchase Tax	many2one	- relation = account.tax
qr_code	Display SEPA QR-code	boolean	
quick_edit_mode	Quick Edit Mode	selection	
quick_edit_mode_enabled	Quick encoding	boolean	
report_footer	Custom Report Footer	html	
restrict_template_rendering	Restrict Template Rendering	boolean	
restrictive_audit_trail	Restricted Audit Trail	boolean	
sale_tax_id	Default Sale Tax	many2one	- relation = account.tax
set_to_review_documents	Review data	boolean	
sfu_server_key	SFU Server key	char	
sfu_server_url	SFU Server URL	char	
show_effect	Show Effect	boolean	
show_sale_receipts	Sale Receipt	boolean	
sign_invoice	Authorized Signatory on invoice	boolean	
sign_preview_ready	Display sign preview button	boolean	
sign_terms	Sign Terms & Conditions	html	
sign_terms_html	Sign Terms & Conditions as a Web page	html	
sign_terms_type	Sign Terms & Conditions format	selection	

signing_certificate_id	Signing certificate	many2one	- relation = certificate.certificate
signing_user	Signature used to sign all the invoice	many2one	- relation = res.users
snailmail_color	Print In Color	boolean	
snailmail_cover	Add a Cover Page	boolean	
snailmail_duplex	Print Both sides	boolean	
tax_calculation_rounding_method	Tax calculation rounding method	selection	
tax_cash_basis_journal_id	Tax Cash Basis Journal	many2one	- relation = account.journal
tax_exigibility	Cash Basis	boolean	
tenor_api_key	Klipy API key	char	
terms_type	Terms & Conditions format	selection	
totals_below_sections	Add totals below sections	boolean	
transfer_account_active	Internal Transfer Account Active	boolean	
transfer_account_id	Internal Transfer	many2one	- relation = account.account
twilio_account_sid	Account SID	char	
twilio_account_token	Account Auth Token	char	
unsplash_access_key	Access Key	char	
unsplash_app_id	Application ID	char	
use_anglo_saxon	Anglo-Saxon Accounting	boolean	
use_call_server	Use Call Server	boolean	
use_google_translate_api	Use Google Translate API	boolean	
use_invoice_terms	Default Terms & Conditions	boolean	
use_sfu_server	Use SFU server	boolean	
use_sign_terms	Sign Default Terms & Conditions	boolean	
use_tenor_api	Use Klipy API	boolean	
use_twilio_rtc_servers	Use Twilio ICE servers	boolean	
web_app_name	Web App Name	char	
write_date	Last Updated on	datetime	
write_uid	Last Updated by	many2one	- relation = res.users - ondelete = Set NULL
